

Abhijeet Singh

Software Developer | abjt.dev

I build engaging experiences for my audience with pixel-perfect and performant applications. With a creative approach to development, I add intuitiveness and life to my work.

I am a big-time musicophile with a passion for art and human psychology. My latest endeavour has been building 3d artwork using Blender.

Experience

AvenueHQ

Junior Full-Stack Engineer | Mar 2022 - Present

- Working on a digital marketing tool for realtors through North America.
- Building a performant client facing API-driven application in React.
- Using Laravel and SQL to build fast, efficient and scalable databases and APIs.
- Collaborating across internal teams to clarify requirements, explore issues, provide updates, and present discoveries.

Outlined.co

Software Engineer | Sept 2019 - Oct 2020

- Developed and maintained the company's product marketing website and flagship design platform using FabricJS and Laravel.
- Built a PDF to HTML canvas converter using JavaScript and Shell Scripting to import and export designs on the browser.
- Implemented API Integration for data storage, social media interaction, text sentimental analysis, and stock image services.

Education

Langara College | Vancouver, BC, Canada

Post-Graduate Diploma | 2020-2022

Web and Mobile App Design and Development

Manipal University Jaipur | Jaipur, Rajasthan, India

Bachelor In Technology | 2015-2019

Information Technology

Technical Skills

Technologies, tools, and utilities I've recently used in personal, educational, and professional projects.

I enjoy wearing multiple hats in a project, working with different cogs of the machine that we call a product.
